

MODULAR DISINFECTION MOBILE SYSTEM

MDMS is an advanced system suitable for sanitization and disinfection of rooms, laboratories, hospitals, nursing homes, schools, factories, malls, transportation vehicles and it is also suitable for sanitization and disinfection of medical tools, clothes.

Thanks to its modularity MDMS can be easily updated in automation, it is able to disinfect rooms in a riskless environment for the workers.

MODULAR DISINFECTION MOBILE SYSTEM

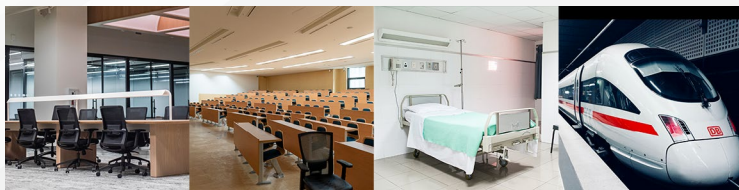

Its modularity allows single or combined usage of a trolley, one or more AGV with cameras and/or COBOT in the following configurations:

- **DISINFECTION SYSTEM BY UV-C RAYS**
- **DISINFECTION SYSTEM BY OZONE SATURATION**
- **DISINFECTION SYSTEM BY SPRAY DROPS AND/OR NOZZLES**
- **BOXES FOR DISINFECTION OF MEDICAL TOOLS AND CLOTHES**
- **TRANSPORTATION BOXES OF PARTS**

The management of the system foresees solutions where the operator, using an app, will guide the whole apparatus and the disinfection systems. Moreover he will be able to set the paths up and will receive the control documents and the certification of the entire job.

Suitable for sanitization and disinfection, in a riskless environment for the workers, of medical tools, clothes, rooms, laboratories, hospitals, nursing homes, schools, factories, malls, transportation, vehicles.

At the end of the disinfection procedures, once the operator will have disassembled the disinfection modules and will have mounted the shelf ones, the system will be able to be also used for moving, packs, batches, docs, tools out of the specific sanitization/disinfection usage.
